DETAILED ACTION

It is noted that 2 sets of claims have been received on the same day. The first set of claims is numbered 1-22 and the second set is numbered 1-34. The second set (1-34) has been examined and will continued to be examined unless otherwise notified in applicant's next response.

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

It is noted that applicant must choose a species from group 1 and group 2. The groups of species are as follows:

Group 1:

- Species A, Figures 1-4
- Species B, Figure 5
- Species C, Figure 6
- Species D, Figure 7
- Species E, Figure 8
- Species F, Figure 9
- Species G, Figure 10

Group 2:

- Species H, Figure 11
- Species J, Figure 12

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Group 1:

- Species A incorporates a straight front edge with a convex rear edge.
- Species B incorporates a convex front edge with a concave rear edge.
- Species C incorporates a straight front edge with a straight rear edge.
- Species D incorporates a straight front edge with a concave rear edge.
- Species E incorporates a concave front edge with a convex rear edge.
- Species F incorporates a concave front edge with a straight rear edge.
- Species G incorporates a concave front edge with a concave rear edge.

Group 2:

- Species H incorporates a horizontal blade.
- Species J incorporates an oblique blade.

Some claims may be generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features as set forth above.
